

# Bases

Designed to offer the ultimate comfort experience, your Dunlopillo mattress can be enhanced when paired with a Dunlopillo base. Conceived to work in perfect harmony with all of our Dunlopillo mattresses, your Dunlopillo base plays an important part in maintaining the performance and longevity of your mattress.

With a host of options that include the firm edge pocketed base, a wireless adjustable base, a unique slatted base and a supremely stylish ottoman, your comfort and aesthetic style can be tailored just for you.

The Dunlopillo combination of mattresses and bases generate a multitude of comfort levels ensuring that the perfect sleep environment can be personalised to you and your partner's exacting requirements.

Dunlopillo mattresses can not be used on solid plywood or hardboard top beds or divans.

## Ottoman

An ottoman base is an ideal solution if space is limited in your bedroom as it provides generous storage space for linen, towels or clothes.

On the ottoman the base lifts easily with the help of gas rams and hinges.

Ventilation holes have been drilled in the lid of the ottoman to allow air to circulate through the upholstery fabric and the mattress positioned on top.

## Adjustable electric

The ultimate in stylish and functional comfort, the Dunlopillo electrically adjustable bed is a fluid harmony of practicality, innovation and design. The sprung birch wood slats individually flex to your body shape, weight and movement providing a firm yet supportive foundation to your Dunlopillo mattress.

The firmness of the system can also be controlled through the use of cleverly designed comfort adjusters positioned in the lumbar region of the system. Moving the adjusters to the outside edge of the system will create a firmer feel, whilst positioning them centrally will create a softer feel.

Individual remote controls allow you and your partner to adjust the back and leg areas to find your perfect comfort position. The wireless remote control even functions as a torch so you do not have to disturb your partner and can be easily stored away when not in use.

## Slatted

The Dunlopillo slatted base incorporates our supremely comfortable sprung birch wood slat system. Driven by our blueprint for comfort, the slat system has been designed to flex to your body weight and movement offering a firmer level of support and comfort compared to the sprung edge base. This system also dramatically increases airflow beneath the mattress, which in turn enhances the natural breathable characteristics of Dunlopillo latex.

The firmness of the system can also be controlled through the use of cleverly designed comfort adjusters positioned in the lumbar region of the system. Moving the adjusters to the outside edge of the system will create a firmer feel, whilst positioning them centrally will create a softer feel.

The slatted base has also been designed to allow for the addition of our solid timber drawer storage options.

## Firm edge pocket

Constructed from sustainable timber, the precisely upholstered Dunlopillo firm edge pocket base supports a responsive pocket spring layer that works in perfect harmony with your Dunlopillo mattress. Seated inside a wooden frame the pocket springs soften the comfort of the mattress while providing a firm edge that prevents 'roll off' from the side of the bed.

One piece mattresses are supplied with drop middle firm edge pocket divans to prevent any feeling of a firm ridge in the middle of the bed, while pairs of mattresses, zip and link mattresses for example, are supplied with firm edge all round divan bases, allowing them to be separated to twin beds when required.

Dunlopillo pocket bases have been designed to give you a deeper, softer comfort level while being constructed to allow the addition of solid timber drawer storage options.

## Base options

	Sizes available and packaged weights						
	75cm x 200cm	90cm x 190cm	90cm x 200cm	120cm x 190cm	135cm x 190cm	150cm x 200cm	180cm x 200cm

# Storage

Adjustable electric, slatted and firm edge pocket bases are available with a choice of three drawer configurations allowing you to add flexible storage to your bedroom.

If you do not require drawers with your base, we also offer a non-storage option. All drawers are assembled from solid hardwood using dovetail joints for strength and glide along smooth operation runners.

If you choose a base with drawers please consider if your room has enough space to open them: bases with drawers will need at least 40cm surrounding space from the side of the bed to enable you to pull the drawers out fully.

	Width	Length	Internal height	Weight limit
Large drawers	78.3cm	52.5cm	15cm	25kg
Small drawers	40.5cm

# Adjustable electric beds

The Dunlopillo fully adjustable electric bed is the ultimate partner in helping you rest, relax and unwind. The intuitive wireless remote control allows you to find your perfect comfort position and the cleverly designed sprung birch wood slats can themselves be adjusted to find the perfect lumbar tension that suits you and your partner's individual needs.

## Wireless control

A Dunlopillo wireless remote control enables you and your partner to independently adjust each side of your Dunlopillo bed to ensure you achieve the very best comfort and a restful night's sleep. The controls have six different adjustable actions that allow you to position your head, back and legs in your ideal comfort position.

The wireless remote control even functions as a torch so you do not have to disturb your partner and can be easily stored away when not in use.

1. Head and foot end raised
2. Head and foot end lowered
3. Head end raised
4. Head end lowered
5. Foot end raised
6. Foot end lowered
7. Torch

# Comfort adjuster slats

The firmness of the slat system on the slatted base and adjustable electric bases can be controlled through the use of cleverly designed comfort adjusters positioned in the lumbar region of the system. Moving the adjusters to the outside edge of the system will create a firmer feel, whilst positioning them centrally will create a softer feel. Other comfort levels can be achieved by moving the adjuster between the soft and firm positions.

1. Slat holders
2. Tension adjuster
3. Fabric centre belt
